(answer was turn modem log on or something) 3. a question on novell. you have a client on novell, proper protocols and services, etc. you cann see novell servers but cannot map a drive to them. why? a. ensure the correct frame type is 0selected b. install tcpip c. etc c. 4. win31, nt, 95, dos on lan. you need them all to access shared folders. what 2 folder names can be seen by all clients. (the only 2 that don t use lfn) 5. there was a question on which apps do not need 3rd party emulation. mac, unix, 16 bit windows, ms-dos apps that use ems, ms-dos apps that use xms, or ms-dos apps that make direct calls to hardware. pick 3 6. a user is complaining of performance problems. you run system monitor and there s lots of page faults, etc. etc. etc. what can be done to help the user s performance??(add more ram) go to the resource kit for the

answer. there is a good explanation. 7. 2 machines are connected to network, clienta and clientb. they have identical hardware/software. one complains that machine is running slower than the other. what can you check for with system monitor? 8. setup crashed during hardware detection. you power off and on. what can you do? the only answer that made sense was restart setup and use safe recovery. all the other ones were either 0delete detlog.txt or move detlog.txt, etc. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
