E7_A7_91CCNA_c101_644730.htm A: Connecting a host to the
old switch has created a broadcast storm.B: The 10BASE-T switch
forced the entire network to be reduced to 10Mbps operation.C:
The old switch does not support VLANs, which has disabled the
VLAN configuration of the entire the network.D: The old switch
does not support full-duplex operation, effectively forcing
half-duplex operation throughout the network.E: Spanning Tree
Protocol has elected the old switch as the root bridge, creating
inefficient data paths through the switched network.Correct
