

Oracle中存储过程和函数的区别Oracle认证考试 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/644/2021_2022_Oracle_E4_B8_AD_E5_c102_644873.htm "libai"> 存储过程和函数： 例子：

```
//创建过程 create or replace procedure add_emailinfo (namee  
email_info.fullname%type , address  
email_info.email_address%type ) is begin insert into email_info  
(fullname, email_address) values (namee, address) ; end  
; //调用过程 call add_emailinfo (cherry, asdfsdf) ;
```

////////////////////////////////////

```
////// //创建函数 create or replace function sel_emailinfo (namee  
email_info.fullname%type ) return varchar2 is address varchar2  
(30) ; begin 0select email_address into address from email_info  
where trim (fullname) =trim (namee) ; return address ; end  
; //调用函数 0select sel_emailinfo (bbb) from dual ; 100Test
```
