: RedHat 4上装oracle 9 实验目的：将用户jiajia的数据导入到用户tianyu 实验步骤如下 1、使用系统用户登陆为用户jiajia创建一个默认表空间名为jiajia [oracle@shanghai ~]\$ sqlplus system/manager@mydb SQL*Plus: Release 9.2.0.4.0 - Production on 星期一 8月 10 20:10:42 2009 Copyright (c) 1982, 2002, Oracle Corporation. All rights reserved. Connected to: Oracle9i Enterprise Edition Release 9.2.0.4.0 - Production With the Partitioning and Oracle Data Mining options JServer Release 9.2.0.4.0 - Production SQLgt. create user jiajia identified by jiajia default tablespace jiajia temporary tablespace temp. User created. 3、授予连接，恢复，导入，导出数据库权限给jiajia SQLgt. quit 4、使用jiajia连接数据库mydb并创建用于测试的表studytable [oracle@shanghai ~]\$ sqlplus jiajia/jiajia@mydb SQL*Plus: Release 9.2.0.4.0 - Production on 星期一 8月 10 20:17:13 2009 Copyright (c) 1982, 2002, Oracle Corporation. All rights reserved. Connected to: Oracle9i Enterprise Edition Release 9.2.0.4.0 - Production With the Partitioning and Oracle Data Mining options JServer Release 9.2.0.4.0 - Production SQLgt. insert into studytable values (1001,aaaa,20,男). 1 row created. SQLgt. insert into studytable values (1003,cccc,22,男). 1 row created. SQLgt. commit. Commit complete. 5、查看新建的表中内容 SQLgt. create tablespace tianyu datafile /opt/oracle/oradata/mydb/tianyu.dbf size 20M uniform size 64k.

Tablespace created. 7、创建用户用户tianyu并指定默认表空间为tianyu，临时表空间为temp SQL>. create user tianyu identified by tianyu default tablespace tianyu temporary tablespace temp. User created. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
