

Java学习笔记整理(4)Java认证考试 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/644/2021_2022_Java_E5_AD_A6_E4_B9_A0_c104_644542.htm 第八章 io 文件输入输出：1、

文本文件：1) 字节读：FileInputStream 方法：read() Exa:
public void fileRead(String fileName){ try { FileInputStream objfi = new FileInputStream(fileName). try { int size = objfi.available(). char ch[]=new char[100]. for(int i=0;i < size;i++){ ch[i]=(char)(objfi.read()). System.out.print(ch[i]). } objfi.close(). } catch (IOException ex1) { } } catch (FileNotFoundException ex) { } } 写：FileOutputStream 方法：write() Exa: public void fileWrite(String fileName){ try { FileOutputStream objfo = new FileOutputStream(fileName,true). String str="ACCP". byte []arrb=str.getBytes(). try { objfo.write(arrb, 0, arrb.length). objfo.close(). } catch (IOException ex1) { } } catch (FileNotFoundException ex) { } } 2) 字符读：FileReader BufferedReader 方法：readLine() Exa: public void charRead(String fileName){ try { FileReader objfr = new FileReader(fileName). BufferedReader objbr=new BufferedReader(objfr). String line = null. try { line = objbr.readLine(). while(line!=null){ System.out.println(line). line=objbr.readLine(). } objbr.close(). objfr.close(). } catch (IOException ex1) { } } catch (FileNotFoundException ex) { } } 写：FileWriter BufferedWriter 方法：write() Exa: public void charWrite(String fileName){ try { FileWriter objfw = new FileWriter(fileName). BufferedWriter objbw=new BufferedWriter(objfw). objbw.write("t64"). objbw.write(" Very Good!"). objbw.newLine(). objbw.write("继续

努力"). objbw.close(). objfw.close(). } catch (IOException ex) { } } 2

、二进制读：FileInputStream DataInputStream 方法：read() 写

：FileOutputStream DataOutputStream 方法：write() Exa: public

void datacopy(String oldFileName,String newFileName){ try {

FileInputStream objfi = new FileInputStream(oldFileName).

DataInputStream objdi=new DataInputStream(objfi).

FileOutputStream objfo=new FileOutputStream(newFileName).

DataOutputStream objdo=new DataOutputStream(objfo). try { int

temp = objdi.read(). while(temp!=-1){ objdo.write(temp).

temp=objdi.read(). } objdo.flush(). objdo.close(). objdi.close().

objfi.close(). objfo.close(). } catch (IOException ex1) { } } catch

(FileNotFoundException ex) { } } 100Test 下载频道开通，各类考
