出个问题吧：请看代码：view plaincopy to clipboardprint?

```
public abstract class A { public A() { initMethod(). } public abstract void initMethod(). } public abstract class A { public A() { initMethod(). } public abstract void initMethod(). } view plaincopy to clipboardprint? public class B extends A { static String staticStr = "static1". private String testStr = "Test1". /* * (non-Javadoc) * * @see A#initMethod() */ public void initMethod() { // TODO Auto-generated method stub testStr = "Test2". staticStr = "static2". }
```
