苹果公司近期发布了一款革命性的无键盘的苹果笔记本电脑 MacBook Wheel，其最大的卖点就是那个 Wheel，传统的键盘被1个巨大触控圆盘（貌似 iPod）代替了，但输入速度却可以用飞快来形容。

This world is buzzing over Apple's latest must-have gadget, the MacBook Wheel, a revolutionary new laptop that does away without keyboard. Tech Trends reporter Jeff Tate has more. Thanks Andrea. Say goodbye to the keyboard and hello to the future of laptop computers. With the MacBook Wheel, Apple has replaced the traditional keyboard with the slick touch-sensitive click wheel. Apple CEO Steve Jobs introduced the product yesterday at the annual Mac expo. Senior Product innovator Brian Gilman says the MacBook Wheel will make typing a thing of the past. Apple's philosophy is to create products that are simple to use, and nothing is more simple than a single giant button. Gilman showed me how the revolutionary new computer works. Just open the intuitive alphabet menu here, scroll to the letter you need, see, and center-click to select it. Then click again to capitalize, and repeat this process with new letter. It couldn't be simpler. Uh... You can also let the predicative sentence technology complete the sentence for you. Gilman says the MacBook Wheel has also simplified the organization of files. So searching

来源：考试大

your hard drive will be a snap. Just press both sides of the wheel concurrently and centre-click there. You have an alphabetical list来源 : www.examda.comng of every file in your hard drive.

Everything is just a few hundred puts away. Apple is calling the MacBook Wheel the most intuitive product ever designed. Here Apple, we ' d like to think we are giving customers features they don ' t even realize they want yet. While the MacBook Wheel won ' t hit the shelves for another 3-15 months, many Apple users already have it on their wish-list. I ' ll buy almost anything for shiny and made by Apple. Alex Zalban was one of the lucky few to get to try out Macwheel and spent 45 minutes typing an e-mail to his friend. I never really realized how much I hated keyboard until I saw this thing. I ' d like have an e-mail that automatically says with Macbook Wheel, that people will know you have one. With the price tag of just under 2600 dollars for the lowest standard MacBook wheel it is an investment. But the super thing laptop features numerous innovations like the new ultra thing, Hummingbird Battery which can power the MacBook Wheel for a full 19 minutes before needing to be recharged. And the computer is virtually unbreakable unless 0dropped them hit. But Apple isn ' t resting on his lore. Brian Gilman says they are already hard at work on the next generation of the MacBook Wheel which will be 4 ounces lighter due to its lack of string hard-driver wheel. For the Onion News Network, I ' m Jeff Tate. Thank you for that Jeff. It remains to be seen if the Wheel will catch on in the business world where people use computers for actual work and not just digging around. Moving on. Police warn

that Sudoku killer will kill either one four or nine victims ' neck.
