机经回忆 考试时间：2011年1月11日 考试地点：成都四川大学
issue：103来源：考试大 "The study of history has value only to
the extent that it is relevant to our daily lives." issue：113 "It is
primarily through our identification with social groups that we define
ourselves." argument：150 The following is a letter to the editor of
an environmental magazine. "The decline in the numbers of
amphibians worldwide clearly indicates the global pollution of water
and air. Two studies of amphibians in Yosemite National Park in
California confirm my conclusion. In 1915 there were seven species
of amphibians in the park, and there were abundant numbers of each
species. However, in 1992 there were only four species of amphibians
observed in the park, and the numbers of each species were
drastically reduced. The decline in Yosemite has been blamed on the
introduction of trout into the parks waters, which began in 1920
(trout are known to eat amphibian eggs). But the introduction of
trout cannot be the real reason for the Yosemite decline because it
does not explain the worldwide decline." 编辑推荐：#0000ff>2011
