If it were possible, however, it would present some pretty knotty paradoxes... For example, what if someone or something traveled back in time and changed the ensuing future? And have you heard the one about the time traveler who dots back and forward in time and by means of various medical technologies is able to be his own father AND mother?! And besides, if time travel is possible, where are all the people from the future--surely theyd want to come and meet us poor stranded 21st century beings?来源

公共英语PETS二级阅读复习(2) The experiment was replicated in 1996 with advanced technology, and it was proved again--with an even bigger time difference this time. Which proves that not only is time “warp-able”, but Einstein was arguably the greatest thinker the world has ever seen. So, time is warped--and this opens up the possibility that we might be able to somehow manipulate it as a mode of travel one day. Already one scientist has

published a paper in which he detailed how to build a time machine. 1996年，科学家用先进的技术重复了同样的实验，也证实了该理论，时间差距甚至更大了。这一实验不仅验证了时间的可扭曲性，还证明爱因斯坦可能是人类史上最伟大的思想家。所以说，时间是可弯曲的。这也使我们或许有朝一日有可能利用它作为某种形式进行旅行。有一位科学家已经发表了一篇论文，详细地描述如何建造一部时间机器。相关推荐：公共英语pets三级全真模拟试卷 公共英语pets二级语法讲解汇总 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
