Firstly, and most obviously, newborn children are completely helpless. Apart from a powerful capacity to pay attention to their helplessness by using sound, there is nothing the newborn child can do to ensure his own survival. Without care from some other human being or beings, be it mother, grandmother, or human group, a child is very unlikely to survive. This helplessness of human infants is in marked contrast with the capacity of many newborn animals to get on their feet within minutes of birth and run with the herd within a few hours. Although young animals are certainly in risk, sometimes for weeks or even months after birth, compared with the human infant they very quickly develop the capacity to fend for them. It is during this very long period in which the human infant is totally dependent on the others that it reveals the second feature which it shares with all other undamaged human infants, a capacity to learn language. For this reason, biologists now suggest that language be “species-specific” to the human race, that is to say, they consider the human infant to be genetic programmed in such way that it can acquire language. This suggestion implies that just as human

beings are designed to see three-dimensionally and in color, and just as they are designed to stand upright rather than to move on all fours, so they are designed to learn and use language as part of their normal development as well-formed human beings. 答案： 1.and ^ infant 加入other。根据上下文，这里主要指的是与其他婴儿相比，不是与任何一个婴儿相比 2.have 改成has。Neither 后面跟单数形式。百考试题 3.pay attention改成draw/ attract/ call .这事一个用词不当的错误，应是引起别人注意的意思。 4.get on their feet on 改成to。Get to their feet 指站立。 5.in risk 或 in risk 改成at或danger。这里可以有两种改法，改成at risk，或是in danger 6.fend for them 改成themselves。这里的主语与濒于同指young animals, 因此要用反身代词 7.on the others 删掉the，这里指的是其他人，不是其他婴儿。 8.language be be改成is。这里suggest不指建议，他指的是提出（看法等），因此不需要用动词原形 9.genetic 改成genetically。这里应该是个副词。 10.such ^ way 加入a。way 在这里是可数名词，因此要加入不定冠词。 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
