```
----- declare v_0 number. v_1 number. cursor c1 is
0select productordernumber from his_productorder@pro_crm
where productid in (9000045516). cursor c2 is 0select cust_order_id
from suf_cust_order_q_his where cust_order_num like v_0||%.
cursor c3 is 0select * from suf_work_order_q_his where
cust_order_id=v_1. begin for i in c1 loop
v_0:=i.productordernumber. for j in c2 loop v_1:=j.cust_order_id.
for k in c3 loop dbms_output.put_line(k.work_order_id||
||k.status). end loop. end loop. end loop.
