```
cmd  
-gt. 0select group#,sequence#,archived,status from v$log. GROUP#  
SEQUENCE# ARC STATUS -----  
----- 1 86 NO INACTIVE 2 87 NO INVALIDATED 3 85
```

```
NO INACTIVE alter database clear logfile group 1. alter database  
clear logfile group 2. alter database clear logfile group 3. shutdown  
immediate. startup mount. SQL> 0select
```

```
group#,sequence#,archived,status from v$log. GROUP#  
SEQUENCE# ARC STATUS -----
```

```
----- 1 88 NO CURRENT 2 0 NO UNUSED 3 0 NO
```

```
UNUSED alter database clear logfile group 1. alter database clear  
unarchived logfile group 1. alter database clear logfile group 2. alter  
database clear unarchived logfile group 2. alter database clear logfile  
group 3. alter database clear unarchived logfile group 3. shutdown.  
startup mount. alter database open. 编辑特别推荐: oracle认证考试
```
