SELECT osuser, username, sql_text from v\$session a, v\$sqltext b where a.sql_address =b.address
order by address, piece. 分析表
analyze table tablename compute statistics for all indexes.
analyze table tablename compute statistics for all indexed columns.
analyze table tablename compute statistics for table. 监控事例的等待
0select event,sum(decode(wait_Time,0,0,1)) "Prev", sum(decode(wait_Time,0,1,0)) "Curr",count(*) "Tot" from v\$session_ Wait group by event order by 4. 查看碎片程度高的表
SELECT segment_name table_name , COUNT(*) extents FROM dba_segments WHERE owner NOT IN (SYS, SYSTEM) GROUP BY segment_name HAVING COUNT(*) = (SELECT MAX(COUNT(*) FROM dba_segments GROUP BY segment_name). 表、索引的存储情况检查
0select segment_name,sum(bytes),count(*) ext_quan from dba_extents where tablespace_name=amp.owner group by segment_name. 找使用CPU多的用户
session 12是cpu used by this session 100Test 下载频道开通，各类考试题目直接下载。详细请访问
