Chinese scientists made the announcement on Wednesday, saying the satellite would be launched in the second half of this year. Since China announced the project in 2004, the country's first lunar exploration project has drawn world-wide attention. Now, China's space scientists say the satellite is ready for lift off. Ouyang Ziyuan, chief scientist, China's lunar exploration project, said, “Preparations for the satellite, rocket, ground control and data reception are ready for the

exploration. We will be able to launch the probe the second half of this year. ” The probe ’ s operational orbit has already been decided on. Chang ’ e I is scheduled to enter the moon ’ s orbit after a nearly 400 000-kilometer journey in space. And a committee of over 100 space experts has also been established for the project. The scientists have agreed to share the data sent back by Chang ’ e I on the lunar environment. Ouyang Ziyuan said, “ We will make a 3D map of the moon and research the distribution of lunar elements, lunar soil thickness and the moon ’ s surface environment. ”

Ouyang Ziyuan says Chang ’ e I will be carried by a Long March A3 carrier rocket for its launch. This is scheduled to take place at the Xi ’ Chang Satellite Launch Center.
