Entomology（昆）蜜蜂的通模式百考试题 - 全国最大教育类网站(100test.com) 小蜜蜂。分 honeybee和worker bee。

了honeybee是怎找蜜源和如何告同伴蜜源的位置的。先蜜蜂和 termite白蚁 很多 Species 不同，他是 social。蜜蜂是一是由社分工合作的物（有他有什共同），交流因此就得很重要（有）。然後科家就始用他的明才智研究小蜜蜂了。始以

是honeybee是靠scent交流，然後某德科家研究 scout 用舞蹈告工蜂蜜源的近，的用八字舞，近的用圈舞。他因此得炸。交流的容靠跳 8 字舞或者 circle dance，而不是食物的（有）。

原 蜜蜂找到以後跳舞是指示food type，後 more than that。

跳舞指示出了direction and distance。跳舞分一是 nectar花蜜 dance 另一 pollen花粉 dance，有一道的，nectar 是跳圈舞

，pollen 是跳 8 字舞。但是一直有科家疑法直到 1989 年，一些科家了他的理做了 machine bees 模仿 scout，就是不去有食物（有考器蜜蜂和其他小蜜蜂有什不同），robot使用些作果然可以向工蜂有效。采蜜只是跳舞做一些指示。最後了小蜜蜂回的和 wind（有考 except 的，其他是 direction, distance 有一忘了）

Bees www. Examda.CoM考试就到百考试题 Flowers provide food for bees. The bees collect tiny grains of pollen and a sweet liquid called nectar from the blossoms they visit. They make honey from the nectar, and use both honey and pollen as food.

During their food-gathering flights, bees spread pollen from one

flower to another, thus pollinating (fertilizing) the plants they visit. This enables the plants to reproduce. 本文来源:百考试题网

The honey bee colony A typical honey bee colony is made up of one queen, tens of thousands of workers, and a few hundred drones雄峰. Honey bees live in hives. The hive is a storage space, such as a hollow 空的 tree or a box, which contains a honeycomb蜂窝. The honeycomb is a mass of six-sided compartments隔间 called cells. Worker bees build the honeycomb of wax produced by their bodies. The wax oozes渗出 through small pores (holes) in the body and forms tiny white flakes on the outside of the abdomen. 来源 : www.examda.com

They also collect a sticky substance bee glue, from certain kinds of trees. The body of the honey bee百考试题 - 全国最大教育类网站(100test.com) A bee has five eyes-three small ones that form a triangle on top of its head, and a large compound eye on each side of its head. Honey bees were the first insects known to be able to distinguish colors. Bees have three kinds of color-sensitive cells in their eyes. These visual cells are especially sensitive to blue, yellow, and ultraviolet rays, which humans cannot see.百考试题论坛

The sting of a worker bee is straight, with barbs (hooks) on it. When the bee thrusts the sting into flesh, the barbs hold tight, and the stinger螫针 pulls out of the bee ' s body. 100Test 下载频道开通 , 各类考试题目直接下载。详细请访问 www.100test.com
