Word came from California of a new weapon in the war on household pests

. Two scientists work for a firm in California developed 1  
. \_\_\_\_\_ a new method to eliminate insects with using  
dangerous chemicals . The new 2 . \_\_\_\_\_ weapon hot air  
. The basic idea is that insect pests can adjust to temperature much  
above 3 . \_\_\_\_\_ normal . In laboratory experiments  
, cockroaches and termites can ' t survive much more than a  
quarter of hour at 100 degrees 4 . \_\_\_\_\_ Fahrenheit or about  
fifty degrees centigrade . The new method involves covering a  
house with a huge tent , and fill it with air heated to 5 . \_\_\_\_\_  
around 65 degrees centigrade . Hot air is forced in with fans and the  
tent keeps the heat inside the house . Although termites try to escape  
by 6 . \_\_\_\_\_ hiding in wood beams , the heat treatment must  
be continued by four to six hours . But when its 7 . \_\_\_\_\_ all  
over and the insects are dead , there are no toxic residues to danger  
humans or pets , and no 8 . \_\_\_\_\_ funny smells . Scientists  
claim that theres no danger of fire too . 9 . \_\_\_\_\_
