Wise buying is a positive way in which you can make your money go further. The way you go about purchasing an article or a service can actually save your money or can add to the cost. Take the example of a hairdryer. If you are buying a hairdryer, you might think that you are making the right buy if you choose one that looks like and which is also the cheapest price. But when you get it home you may find that it takes twice as long as a more expensive one to dry your hair. The cost of the electricity plus the cost of your time could well make your hairdryer the most expensive one of all. So what principles should you follow when you go out shopping?
