My View on Fake Commodities

The prevalence of fake commodities has been a big problem in our society. Almost every day in newspapers carry articles pertaining to fake commodities. Although measures have been implemented to deal with this problem, it still remains a serious threat. Fake goods are harmful on many levels. People sell fake commodities to make a quick profit which undermines the economy and fake goods can also be dangerous to one's health. The effect is a general mistrust among consumers toward sellers and the free market in general. In addition, many fake commodities have been exported overseas which has resulted in a poor reputation for goods coming out of China and has had a negative influence on exports. 用My View On Fake Commodity改写Brain Drain

Brain Drain Brain drain is a delicate problem with which our country is confronted. In the last ten years or so, a lot of scientists and

technicians have swarmed into developed countries for further studies or research work, let alone numerous promising students. And there are no indications that they will be back home before long. Our country has paid the expenses of training them but lost them. How did that come about? It is self-evident that their delay of coming back is due to those favorable working and living conditions which are essential to research work. Sophisticated equipment makes it easier for one to gain academic achievements. Our competent scientists abroad are offered higher rewards and greater opportunities which contribute to their success in career. It seems that it isn't impossible to solve the problem and attract the scientists and the like back home so long as great importance is attached to the intellectual workers deserving treatment and effective measures are taken to provide them with excellent pay and agreeable conditions. 1997年1月
