1998年6月大学英语六级阅读理解真题及答案英语六级考试 PDF转换可能丢失图片或格式,建议阅读原文 https://www.100test.com/kao_ti2020/645/2021_2022_1998_E5_B9_ B46_E6_9C_c84_645102.htm jiejie"> Questions 21 to 25 are based on the following passage. Cyberspace (网络空间), data superhighways, mullet media-for those who have seen the future, the linking of computers, television and telephones will change our lives for ever, Yet for all the talk of a forthcoming technological utopia (乌 托邦) little attention has been given to the implications of these developments for the poor. As with all new high technology, while the West concerns itself with the "how," the question of "for whom " is put aside once again.本文来源:百考试题网 Economists are only now realizing the full extent to which the communications revolution has affected the world economy. Information technology allows the extension of trade across geographical and industrial boundaries, and transitional corporations take full advantage of it. Terms of trade, exchange and interest rates and money movements are more important than the production of goods. The electronic economy made possible by information technology allows the haves to increase their control on global markets-with destructive impact on the have-nots. For them the result is instability. Developing countries which rely on the production of a small range of goods for export are made to feel like small parts in the international economic machine. As "futures" (期货) are traded on computer screens, developing countries simply have less and less control of their destinies. So what are the options for regaining control? One

alternative is for developing countries to buy in the latest computers and telecommunications themselves-so-called " development communications " modernization. Yet this leads to long-term dependency and perhaps permanent constraints on developing countries ' economies. Communications technology is generally exported from the U.S., Europe or Japan. the patents, skills and ability to manufacture remain in the hands of a few industrialized countries, It is also expensive, and imported products and services must therefore be bought on credit-credit usually provided by the very countries whose companies stand to gain. Furthermore, when new technology is introduced there is often too low a level of expertise to exploit it for native development. This means that while local elites, foreign communities and subsidiaries of transitional corporations may benefit, those lives depend on access to the information are denied it.来源:考试大的美女编辑们 21.
