These classes can be classified into two categories. First, on school subject, their intention is to reinforce and enrich the children ' s knowledge acquired in school by means of more clarification and exercises. Second, classes to cultivate children ' s interest, such as classes in English, dancing, etc. Children ' s attending classes in their spare time has become a controversial issue. Those who are for it think that the practice is good for the long term benefit of children and can enlighten children ' s interest, broaden their horizon. Those who are against it hold the view that children have been deprived of their free time by attending classes they are not interested and thus become mechanical learners,

at the price of their own interests. I think children should have the right to enjoy their childhood, and to play. But certain guidance by parents to attend some classes is necessary since the parents have reasoning power and experience to raise the children to be prepared for their future with diversified interest and competence. But these classes should be refreshing and be able to attract children's interest and not too much. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
