After all, money is not highly prioritized for someone fresh from school. Rather, gaining experience and qualification would be more important. 其中 In my opinion, opinion的发音有的人读错，重音、卷舌音乱来；As far as Im concerned有的人说成了 as far as I am concern, 这也是错的。 - About the place where

you work or study. * I am a student in the Renmin University and I study finance in the School of Finance. What I am most proud of my university is the prestige, which has been built over years with joint efforts from the school administration, professors and scholars as well as from business owners. ... Type 2 Could you tell me - How important you think imports are for people in your country

imports 的含义有些考生没有理解，那就是“进口”；理解后，也有人回答的不扣题。大部分人都能想到引进先进技术，但是英文的表述欠缺，下面这个回答较好：Needless to say, imports play an essential role in economic development of China. In 1980s, China has just started the open-door policy and imports and exports started to become more dynamic. There are three significant aspects impacted by imports. The first one is in culture. Imported TV programs from Japan, US and some European countries brighten up the TV screens. The earliest ones include A Xin, produced in Japan, which is a biography of a tenacious woman named A Xin, who thrived the ups and downs in her life through hard-working. Another one, Man from the Atlantis, produced in the US, is a science fiction. The 2nd aspect is in commodities. Brand names such as Maxim, a French brand, and McDonalds, the fast food chain, entered the Chinese market. Later on, a lot of other well-known big names followed suit. Lastly, new technologies in car-making, information technologies were also imported initially, though numerous solutions and innovations have been developed locally by Chinese later on.
