The English Language English is the principal language of the United States , Canada , United Kingdom , Ireland , Australia , New Zealand , Bahamas , Jamaica , Barbados , Grenada , Trinidad and Tobago , and Guyana ; the official language of over a dozen African countries , and other areas such as Belize , Hong Kong , and Gibraltar , and numerous islands in the Caribbean , Atlantic , Indian , and Pacific oceans ; also the "associated official language" of India. English speakers reach 365 million , so the language has been referred to as the "unofficial international language". There are three recognized periods in the history of English : Old English , from earliest time to 1150 A. D. ; Middle English , 1150-1500 ; and Modern English , 1500 to the present. English reigned in England only in the late 14th century , with London dialect as the standard. As late as in 1700 , there were only 8. 5 million English speakers. As a result of vast colonial expansion , the number shot up to 123 million by 1900 , and has since tripled. English is structurally closer to Chinese than to any of its European cousins. Parts of speech are often fuzzy ; the word "up" can be an adverb , preposition , verb , noun , or adjective. Word order is stereotyped ; there is a big difference in meaning between "look over" and "overlook" or "stand with" and "withstand". Seven different meanings can be put into the following sentence by successively

inserting the modifier "only" before each of the words : She told me that she loved me. "Run" has more than 250 meanings. The complete English vocabulary consists of almost 1 million words , yet 3 , 000 words make up 95% of all utterance. English accounts for 3/4 of the worlds mail , 1/2 of the newspapers , and 3/5 of all radio stations.
