Smuggling It is not unusual for a pet to be sent by air cargo from Colombia to New York , but last December ' s shipment of a 4-year-old sheep dog caught a New York Kennedy Airport Customs inspector ' s eye. The dog looked to be on its last legs , and there was an unusual lump on the side of its body. An X-ray and emergency surgery revealed the presence of 10 condoms tightly packed with five pounds of cocaine that had been surgically implanted in the dog ' s abdomen - yet another first for Customs in the war on drugs. When it comes to transporting drugs , the methods used are only as limited as a smuggler ' s imagination. Kilo bricks of cocaine are routinely concealed beneath false bottoms of containers that hold poisonous snakes. "You ' ve got snakes that are 12feet long , " says a United States Fish and Wildlife Service agent - and sometimes the drug is in the snake. "Who ' s going to pull it out and feel it?" Given this deluge , one can only wonder if agents are ever confounded by some of the smuggling methods. "There are things we haven ' t seen before , " says John McGhee , a Miami Customs special agent , "but nothing really surprises us." 练习 : 1. The dog was different from others in that A) it could stand only on its hind legs. B) it had only two legs C) it was very attractive来源 : 考试大的美女编辑们 D) it had a very big abdomen 2. How many methods are used to transport drugs? A) As many as a smuggler can think of. B) Beyond the smuggler ' s
