：4月16日。考试临近，百考试题专四站点编辑特为各位考友准备了每日一练套餐，考题都为全真模拟试题或历年真题中的题型，与考试题型完全吻合，希望能在最后的冲刺时间里给大家带来一点帮助。

Part 6 writing section A composition Every year billion tons of carbon dioxide is added into the air, which in part results in global warming and climate changes. You are required to contribute your suggestions as to how to reduce carbon emission. Write on ANSWER SHEET THREE a composition of about 200 words on the following topic: My View on Reducing Carbon Emission You are to write in three parts. In the first part, state specifically what your opinion is. In the second part, provide one or two reasons to support your idea OR describe your idea. In the last part, bring what you have written to a natural conclusion or make a summary. Marks will be awarded for content, organization, grammar and appropriateness. Failure to follow the instructions may result in a loss of marks.

section B note-writing Write on ANSWER SHEET THREE a note of about 50-60 words based on the following situation: Jane, your classmate, is thinking of buying an MP3. And you would like to recommend one to her. Write a note, telling her which brand it is and describing two features of the MP3. Marks will be awarded for content, organization, grammar and appropriateness.

范文： My View on Reducing Carbon Emission Billion tons of

carbon dioxide is let off into the air each year, which in part cause global warming and climate changes. Life on this planet will be gravely affected unless we take measures to reduce carbon emission. To achieve this aim, I think the entire society should form the concept of energy-saving and do what we can in our daily life. First, replace the traditional electric bulbs with the energy-saving ones. By saving energy this way, we can reduce a lot of Carbon emission. Second, choose public transportation instead of driving your own car. We can imagine that the fewer cars on the road, the less carbon dioxide will be emitted into the air. Third, when you are shopping, 0select the goods with simple package. If we 0select the goods with simple package, we will produce less garbage and thus reduce carbon emission resulting from burning the garbage. And dont forget to use recyclable bags instead of plastic ones when shopping. Therefore, reducing carbon emission in our daily life is very easy. As long as we all make efforts to do that every day, we can help to reduce billion tons of carbon emission every year.
