femininity in both male and female faces。 结果显示，女校的学生和上混校的学生相比，更喜欢女性特征明显的男性以及女性。 Dr Tamsin Saxton, who led the study, said: "Interestingly, the weakest effect of visual diet was in relation to boys judgments of girls faces." 组织这项研究的汤姆森萨克斯顿博士表示，有趣的是，男生们对女性面容的评价甚少受到“视觉口味的偏好”的左右。 "This might be because femininity is such an over-riding cue to female facial attractiveness, or perhaps because even at a single-sex school, boys see more female faces around them, in their teachers and so on." “这可能是由于女性特征面容的特点更为明显，或者是由于对男校学生来说，他们身边有更多的女性面容，比如他们的老师等等。” Previous studies have suggested women tend to prefer men with feminine faces such as Leonardo DiCaprio or Jude Law for long-term relationships。 以往进行的调查显示，女性更愿意与面容有女性气质的男性建立长久的关系，比如莱昂纳多迪卡普里奥和裘德洛。 100Test 下载频道开通，各类考试题目直接下载。 详细请访问 www.100test.com
