

httpClient抓取网页内容计算机等级考试 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/645/2021_2022_httpclient_c97_645330.htm 1.想下载远程URL地址的内容。可以使

用httpClient现在整理一下相关的代码：而且解决中文乱码问题www.Examda.CoM考试就到百考试题 方法一：流转码

```
public String convertStreamToString(InputStream is) throws
UnsupportedEncodingException { BufferedReader reader = new
BufferedReader(new InputStreamReader(is,"gbk")). StringBuilder sb
= new StringBuilder(). String line = null. try { while ((line =
reader.readLine()) != null) { sb.append(line "\n"). } } catch
(IOException e) { e.printStackTrace(). } finally { try { is.close(). }
catch (IOException e) { e.printStackTrace(). } } return sb.toString().
} //下载内容 private String urlContent(String urlString) throws
HttpException, IOException { HttpClient client = new
HttpClient(). GetMethod get = new
GetMethod("http://www.tianya.cn/publicforum/articleslist/0/no20.s
html"). client.executeMethod(get).
```

```
System.out.print(get.getResponseCharSet()). InputStream iStream =
get.getResponseBodyAsStream(). String contentString =
convertStreamToString(iStream). get.releaseConnection(). return
contentString. } 通过GET方法能够实现下载网页内容出来的 编
