

在Java中调用Perl脚本计算机等级考试 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/645/2021_2022__E5_9C_A8J_ava_E4_B8_AD_c97_645479.htm 有两种方法，第一种是直接 `Runtime.getRuntime().exec("...")`。这里推荐第二种，可以得到输出和返回值：源代码如下：

```
import java.io.BufferedReader.  
import java.io.InputStream. import java.io.InputStreamReader.  
public class ExecPerl { public static void main(String args[]) {  
String[] cmd = { "C:\\cygwin\\bin\\perl.exe", "sample.pl", "param1",  
"param2" }. StringBuffer resultStringBuffer = new StringBuffer().  
String lineToRead = "". // get Process to execute perl, get the output  
and exitValue int exitValue = 0. try { Process proc =  
Runtime.getRuntime().exec(cmd). InputStream inputStream =  
proc.getInputStream(). BufferedReader bufferedRreader = new  
BufferedReader(new InputStreamReader(inputStream)). // save first  
line if ((lineToRead = bufferedRreader.readLine()) != null) {  
resultStringBuffer.append(lineToRead). } 100Test 下载频道开通，
