

三个提示成功避免windows的黑屏死机计算机等级考试 PDF转换可能丢失图片或格式，建议阅读原文

https://www.100test.com/kao_ti2020/645/2021_2022__E4_B8_89_E4_B8_AA_E6_8F_90_E7_c98_645018.htm 并不需要任何助力推波，特别是当一个关键漏洞可以影响Windows 7时，消息本身就足够FUD（恐惧，不确定，怀疑和反对微软）了。有消息称，微软的更新造成个人电脑的使用黑屏死机的做法，是夸大和错误的几百万倍数了。显然，它们在无事生非。黑屏死机报告最初是由安全公司Prevx在11月末发出的，他们认为这是微软周二补丁更新造成的。但是一个像微软“黑屏”门的标题可能会影响在Windows 7，Vista和XP万万使用者，而事实上这事和Prevx从来就没有过联系。对于由此引发的蝴蝶效应，微软表明，Prevx主要是在于为自己感兴趣的耸人听闻的事情宣传。针对这件事情的可能会造成的恶劣影响，微软立即调查了这个问题，并确定其补丁也没有任何责任。Prevx也在随后进行了道歉，并承认触发黑屏死机的根本原因不涉及微软的补丁。现在普遍的理论是，它关系到一个恶意软件的感染，最有可能是木马 Daonol家庭感染了注册表。现在看来，在所有类似的FUD问题里，一个黑屏死机问题，不只是影响“数以百万计的Windows 7，Vista和XP系统”本身。更多的是在用户里产生的影响，可能是百万，也可能是千万或者更多。嘿，这里有三个秘诀，来看一看，它可以确保您的Windows PC不会成为受灾对象：1.坚持保持更新。我了解“你”的全部秘密-最恶意的攻击来自于那些已知的漏洞补丁。当然，还有零日漏洞那样的例外，但对于各种恶意软件的最好的防守之一是简单地确保您的操作系统和应用程序使用

了最新的修补程序的所有应用。 2.保护防御恶意软件。如果黑屏死机确定是由一些木马Daonol家族的变种造成的，然后是你安装了非常有意义的反流氓软件，那么它就可以保护好你的电脑免除侵害。 有一个为Windows系统用户推荐的软件，那就是微软提供的完全免费的反恶意软件的安全软件。 3. 确保启动修复。虽然Prevx关于微软是造成黑屏死机的信息有错误，但作为一家安全厂商本身，在根源触发启动问题的研究上面还是拥有非常良好的声誉的，大多时候也是值得信任的（eNet小编恶搞：恩恩，有多少呢？---和网站观点无关，纯属个人看法）。 Prevx已表示，在所有情况下，运行修复程序在一个确认范围内，已被确定黑屏死机的Windows通过下载Prevx的问题时可以修复的。如果你在“百万分之一”之中不知道黑屏死机怎么处理，下载和运行Prevx修复时可能会产生一些问题。 Prevx也已经提前想到了，并提供了如何下载和运行受影响的系统的修复分步说明文档了。（tyrael）原文：
especially with news of a critical flaw affecting Windows 7. News that a Microsoft 0update is causing "millions" of PCs to experience a "black screen of death" is both exaggerated and wrong. Apparently, its much ado about nothing. Originally reported by security firm Prevx , the black screen of death issue was believed to have been caused by 0updates issued by Microsoft on the November Patch Tuesday . The combination of a headline like "Black Screen woes could affect millions on Windows 7, Vista and XP" and the fact that Prevx didnt bother to contact Microsoft about the issue suggest that Prevx was primarily interested in sensational publicity for itself. Microsoft investigated the issue and determined that its patches are

not to blame . Prevx followed up with a post apologizing to Microsoft for the inconvenience, and admitting that the root cause that triggers the black screen of death is, in fact, not related to Microsofts patches. The prevailing theory now is that it is related to a malware infection, most likely something from the Daonol family of Trojans . All FUD aside, there does seem to be an actual black screen of death issue, it just isnt impacting "millions" of Windows 7, Vista, and XP systems. Maybe hundreds. Here are three tips to help ensure your Windows PC doesnt become one of the afflicted: 1.Keep I have a secret for you--most malware exploits known vulnerabilities for which patches already exist. Sure, there are zero-day vulnerabilities as well, but one of the best defenses against malware of all kinds is to simply ensure that your operating system and the applications you use have all of the latest patches applied. 2.Protect Against Malware. If its true that the black screen of death is caused by some variant of the Daonol family of Trojans, then it makes sense that anti-malware software could protect your PC from it. There is a vast array of security products for Windows PCs--both free and commercial. Microsoft offers its anti-malware security software, Microsoft Security Essentials , for free. 3.Run the Fix. While Prevx was mistaken about the Microsoft 0updates being guilty for causing the black screen of death, it still has a pretty solid reputation as a security vendor and its research into the root cause that triggers the issue seems to be accurate. Prevx has stated that its fix does not work in all cases, but running the fix has a fair chance of fixing the issues within Windows that have been determined to trigger the black screen of

death. Download the Prevx fix and give it a shot. If you are one of the "millions" already struck down by the black screen of death, downloading and running the Prevx fix can be problematic. Prevx has already thought of that and has provided step-by-step instructions for how to download and run the fix from an affected system. 编辑特别推荐: Windows7如何安装字体快捷方式 在双系统下删除Windows7 巧妙修改hosts文件手工屏蔽恶意网站 关闭电脑上没用的服务加快电脑运行 100Test 下载频道开通, 各类考试题目直接下载。详细请访问 www.100test.com
