Asian Americans have made outstanding contributions to the United States. These contributions include natural science, medicine, law, literature, art, etc. Because the native countries of Asian immigrants have rich and colorful traditions, they have greatly promoted American culture, and improved the living standards of the whole American people. 参考

: Private Cars or Public Transportation 【参考范文】 Private Cars or Public Transportation Many people appreciate the convenience of private cars. A private car gives more comfort and mobility and enables people to go whenever and wherever he likes, so he can enjoy his leisure to the full by making trips to the country or seaside at weekends, without the irritation caused by waiting for buses or trains. But public transportation is also attractive. With someone else driving for us, we can feel relaxed on a bus or subway. And public transportation helps to lessen air pollution and traffic jams. It costs us less money and brings more jobs for others. As far as I'm concerned, both public transportation and private cars, however, have their own disadvantages. In fact the bus system does not provide frequent stops

and the location of the bus stops is sometimes not so convenient. And a private car also has many problems, such as too much harmful carbon monoxide emitted. It often puts the traffic in and around the city to much trouble. However, I hate the air pollution and traffic jams caused by private cars. So, given the chance, I would prefer public transportation.
