09.07.25CN : Do you agree or disagree with the following statement? Being creative, rather than planning carefully, helps people come up with the best solution to a problem. If I were asked which weapon I prefer to use to win a battleship or spear, I think I would lose using any weapon alone. It can be vividly compared to this topic. When finding solutions to a problem, a careful plan is like a strong shield protecting us from going into chaos, while creativity is like a sharp spear helping us solve problems efficiently. We need both of them. To begin with, let ' s look at the importance of being creative. On the one hand, being creative can help people think out of the box and find effective solutions. On the other hand, without ideas coming from creative thinking, plan can be nothing but a mere scrape of paper. Here is an example of being creative. Back to the years when online trading was not so prevailing as it is today, most books were sold in bookshops. As a result, there was a limited space to store books and a limited radius of potential customers. To solve such problems, Amazon decided to store their books in large warehouses and sell them on the Internet. In this way, they can offer a greater 0selection of books at a

lower cost and to more people. This creative idea not only solved the problems of limited space of storage, but also made Amazon.com a success in an already competitive market. However, most of the time, creativity alone cannot guarantee a best solution. Creative ideas need to be organized and planned carefully to be effective. Planning is leveraged time. Several minutes planning before tackling a problem can improve our productivity and efficiency greatly. Lacking this step, any good idea from brainstorm may be fruitless. Here is an example of my own. At the end of every semester, I always run into a rushing time, because I have to prepare for the examinations, finish several papers, and close some research report. It is quite easy to get lost in such a busy time. Thus, I started to learn planning strategically to improve my efficiency. I would establish a “ to do ” list according to priorities of things and tick off the items as I move forward. In this way, I can manage my time and solve multiple problems at the same time. In conclusion, I would like to quote a saying from General Eisenhower, “ In preparing for battle I have always found that plans are useless, but planning is indispensable. ” If we plan without being creative, it is certainly meaningless. The best solution to a problem always comes up when planning carefully and thinking creatively work together. 相关推荐：#0000ff>2010年11月14日托福考试预测机经09.05.31CN写作范文 #0000ff>2010年10月份托福机经汇总 #0000ff>2010年9月份托福机经汇总 #0000ff>2010年8月份托福机经汇总 #0000ff>2010年7月份托福机经汇总 #0000ff>2010年6月份托福机经汇总 100Test 下载频道开通，各类考试题目直接下载。详细请访问 www.100test.com
