Intergovernmental Panel (IPCC), has released a new report in Uganda ' s capital Kam-pala, urging countries to come up with disaster management plans to adapt to the growing risk of extreme weather events linked to human-induced climate change. The report allows for variables based on future greenhouse gas, but concludes that extreme weather is likely to increase. The report also says tropical cyclones are likely to, but the ones that do form are expected to be even more destructive. 联合国政府间气候变化问题小组（IPCC）在乌干达首都坎帕报告，敦促各国想出灾害控制计划来应对与人为引起的气候变化相关的极端气候的不断增加风险。该报告考虑到以未来温室气体排放为基础的可变因素，但是得出的结论是极端气候可能会增加。报告还指出，热么频繁，但是可能形成的极端天气预计会更有破坏性。更多推荐：#0000ff>2011年12月英语四六级阅读：朋友也能租赁，你相信吗 #0000ff>2011英语四六级阅读：七夕情人节完美表达 #0000ff>2011年12月英语六级考试阅读：心情差狂购物 #0000ff>2011.12英语六级阅读：刘翔亚锦赛冠军 专题推荐：#0000ff>2011年12月17日英语六级考试冲刺专题 100Test 下载频道开通，各类考试题目直接下载。
