下面的短文有5处空白，短文后有6个句子，其中5个取自短文，请根据短文内容将其分别放回原有位置，以恢复文章原貌。 第5部分：补全短文(第46

~ 50题，每题2分，共10分) 下面的短文有5处空白，短文后有6个句子，其中5个取自短文，请根据短文内容将其分别放回原有位置，以恢复文章原貌。 Lowering the Risk of Heart

Disease Like millions of other Americans, I come from a family with a history of the heart disease. My father had his first three heart attacks when he was only thirty-one. \_\_\_\_\_ (46) I grew up

with heart disease. It was there, but I didn't take it seriously. When I was thirty-one, my blood cholesterol (胆固醇) level was measured for the first time. It was 311 mg/dl, the doctor told me, an extremely high level that put me at a very high risk of heart disease, especially with my family history. He sent me to the National Institutes of Health (NIH) to be screened for participation in a clinical trial.

\_\_\_\_\_ (47)来源：考试大 At NIH, physicians explained the degree of risk associated with my blood cholesterol level and the nature of the experiment. This test involves putting a tube through a leg artery (动脉) up to the heart. \_\_\_\_\_ (48) Learning about

the risks of the experiment as well as the risk associated with my raised blood cholesterol level scared the life out of me. Although I was excluded from participating in the study, the experience may well have saved my life. For the first time, I began to realize the

seriousness of high blood cholesterol. \_\_\_\_\_ (49) But equally important, I got a taste of what it is like to be a patient, to have tests done on me and to think of myself as sick. This was hard to take.

This experience taught me two lifesaving lessons. First, although I felt fit and strong, I was actually at high risk for heart disease because of my high blood cholesterol level. And with my family history, it could not be ignored. \_\_\_\_\_ (50) A. Second, I could lower my blood cholesterol level simply by changing what I ate. B. I was three years old at that time. C. There is not enough oxygen in the blood. D. It was a heart attack just waiting to happen. E. The trial was designed to test the effect of lowering blood cholesterol on the risk of heart disease. F. The death rate for the test was only 1 in 100, I was assured.
