Medical journals are publications that report medical information to physicians and other health professionals. In the past , these journals were available only in print. With the development of electronic publishing , many medical journals now have Web sites on the Internet , and some journals/publish only online. A few medical journals , like the Journal of the American Medical Association , are considered general medical journals because they cover many fields of medicine. Most medical journals are specialty journals that focus on a particular area of medicine. Medical journals/publish many types of articles. Research articles report the results of research studies on a range of topics varying from the basic mechanisms of diseases to clinical trials that compare outcomes of different treatments. Review articles summarize and analyze the information available on a specific topic based on a careful search of the medical literature. Because the results of individual research studies can be affected by many factors , combining results from different studies on the same topic can be helpful in reaching conclusions about the scientific evidence for preventing , diagnosing or treating a particular disease. Case conferences and case reports may be/published in medical journals to educate physicians about particular illnesses and how to treat at them. Editorials in medical journals are short essays that express the views of the authors , often regarding a research or

review article/published in the same issue. Editorials provide perspective on how the current article fits with other information on the same topic. Letters to the editor provide a way for readers of the medical journal to express comments , questions or criticisms about articles/published in that journal. 1.
