，通过课程学习，可以得到3-4分，为了提高广大考生的阅读判断能力，百考试题特整理了以下“职称英语考试理工A级阅读判断练习”资料，供考生复习。阅读判断题：阅读下面这篇短文，短文后列出了7个句子，请根据短文的内容对每个句子做出判断。如果该句提供的是正确信息，请选A.如果该句提供的是错误信息，请选B.如果该句的信息文章中沒有提及，请选C.

Mad Scientist Stereotype Outdated Do people still imagine a physicist as a bearded man in glasses or has the image of the mad scientist changed? The Institute of Physics set out to find out whether the stereotype of a physics boffin (科学家) still exists by conducting a survey on shoppers in London. The people were asked to identify the physicist from a photograph of a line-up of possible suspects. 98 percent of those asked got it wrong. The majority of people picked a white male of around 60, wearing glasses and with a white beard. While this stereotype may have been the image of an average physicist fifty years ago, the reality is now very different. Since 1960 the number of young women entering physics has doubled and the average age of a physicist is now 31. The stereotype of the absent-minded scientist has lasted a long time because the media and Hollywood help promote the image of men in white lab coats with glasses sitting by blackboards full of equations(等式) or working with fizzing (嘶嘶响) test tubes. These stereotypes are really

damaging to society. Very good school children are put off studying science because they don't see people like themselves on television or in magazines doing science. They simply don't relate to the media's image of the mad scientist. This is one reason why fewer young people are choosing to do science at university. If we want to encourage more young people to study science subjects, we need to change this image of the scientist and make science careers more attractive. But we must also develop children's interest in science. In an attempt to change this negative image, an increasing number of science festivals are being organized. Thousands of people from secondary schools are also encouraged to take part in nationwide science competitions of which the most popular are the national science Olympiads. Winning national teams then get the opportunity to take part in the International Science Olympiads which are held in a different country every year. These events are all interesting for the young people who take part but they only involve a small proportion of students who are already interested in science. It seems that there is a long way to go before science becomes attractive as subjects like computer studies or fashion and design.

- 1 Most people have similar ideas of what a physicist looks like. A Right B Wrong C Not mentioned
- 2 The majority of physicists in Britain today are Cambridge graduates A Right B Wrong C Not mentioned
- 3 The media and the cinema have played a role in promoting the image of the mad scientist. A Right B Wrong C Not mentioned
- 4 There will be more women scientists than men scientists in the future A Right B Wrong C Not mentioned
- 5 More children will

study science if it becomes more attractive. A Right B Wrong C Not mentioned
6 The image of the mad scientist is really encouraging to society. A Right B Wrong C Not mentioned
7 The International Science Olympiads are held once every two years. A Right B Wrong C Not mentioned
【参考答案】1. A 2. C 3. A 4. C 5. A 6. B 7. B
