And no more mobile phone transmitter towers should be built until the long-term health effects of the electromagnetic radiation they emit are scientifically evaluated, he said. “ Nobody ’ s going to <sup>0</sup> drop dead overnight<sup>2</sup> but we should be asking for more scientific information, ” Robert Bell said at a conference on the health effects of low-level radiation. <sup>1</sup>来源：考试大 A report widely circulated among the public says that up to now scientists do not really know enough to guarantee there are no ill-effects on humans from electromagnetic radiation. According to Robert Bell, there are 3.3 million mobile phones in Australia alone and they are increasing by <sup>3</sup> 2,000 a day. <sup>2</sup> As well, there are 2,000 transmitter towers around Australia, many in high density residential areas<sup>5</sup>. <sup>3</sup> The electromagnetic radiation emitted from these towers may have already produced some harmful effects on the health of the residents nearby. Robert Bell suggests that until more research is completed the Government should ban construction of phone towers from within a 500 metre radius of

school grounds, child care centres, hospitals, sports playing fields and residential areas with a high percentage of children. 4 He adds that there is also evidence that if cancer sufferers are subjected to electromagnetic waves the growth rate of the disease accelerates. 5 According to Robert Bell, it is reasonable for the major telephone companies to fund it. Besides, he also urges the Government to set up a wide-ranging inquiry into possible health effects. 词汇： mobile adj. 移动的 electromagnetic adj. 电磁的 transmitter tower 发射塔 shield n. 隔离屏 circulate v. 流传 百考试题 - 全国最大教育类网站 (www . 100test. com) density n. 密度 disregard v. 不顾 accelerate v. 加速, 加快 注释： 1. 动词 prove 用的是过去式形式 proved, 这是一种虚拟语气表示假设的用法。 2.
