```
Person.java package com.zjut.yunfeiyang. import java.io.Serializable.
public class Person implements Serializable{ private static final long
serialVersionUID = -5434734211562785652L. public Person() { }
private String name. private String password. private String id.
private String address. /** * @return the name */ public String
getName() { return name. } /** * @param name the name to set */
public void setName(String name) { this.name = name. } /** *
@return the password */ 100Test 下载频道开通，各类考试题目
